

**Project Name:** 336 GREAT RD.  
**Project Number:** Not Specified

**Lab Number:** L0811890  
**Report Date:** 08/18/08

### Case Narrative

The samples were received in accordance with the Chain of Custody and no significant deviations were encountered during the preparation or analysis unless otherwise noted. Sample Receipt, Container Information, and the Chain of Custody are located at the back of the report.

The data presented in this report is organized by parameter (i.e. VOC, SVOC, etc.). Sample specific Quality Control data (i.e. Surrogate Spike Recovery) is reported at the end of the target analyte list for each individual sample, followed by the Laboratory Batch Quality Control at the end of each parameter. If a sample was re-analyzed or re-extracted due to a required quality control corrective action and if both sets of data are reported, the Laboratory ID of the re-analysis or re-extraction is designated with an "R" or "RE", respectively. When multiple Batch Quality Control elements are reported (e.g. more than one LCS), the associated samples for each element are noted in the grey shaded header line of each data table. Any Laboratory Batch, Sample Specific % recovery or RPD value that is outside the listed Acceptance Criteria is bolded in the report.

Please see the associated ADEx data file for a comparison of laboratory reporting limits that were achieved with the regulatory Numerical Standards requested on the Chain of Custody.

---

### Sample Receipt

The samples were received at the laboratory above the required temperature range. The samples were delivered directly from the sampling site but were not on ice.

### MCP Related Narratives:

#### Volatile Organics

In reference to question E:

The WG332718-2 LCSD recoveries associated with L0811890-01 were above the acceptance criteria for 1,2,3-Trichloropropane (137%) and Isopropylbenzene (136%); however, the associated samples were non-detect for these target compounds. The results of the original analysis are reported.

**Case Narrative (continued)**

**PCB**

In reference to question E:

The WG332403-2/-3 LCS/LCSD RPDs associated with L0811890-01 are above the acceptance criteria for Aroclor 1016 (39%) and Aroclor 1260 (37%); however, the individual LCS/LCSD recoveries are within method limits. The results of the associated samples are reported.

**Metals**

In reference to question F:

All samples were analyzed for a subset of MCP elements per the Chain of Custody.

I, the undersigned, attest under the pains and penalties of perjury that, to the best of my knowledge and belief and based upon my personal inquiry of those responsible for providing the information contained in this analytical report, such information is accurate and complete. This certificate of analysis is not complete unless this page accompanies any and all pages of this report.
